Professional Summary

Software Engineer and Flutter Developer, graduated from **Damascus University – Faculty of Informatics Engineering, specializing in Software Engineering**.
Passionate about building scalable, user-centric applications and skilled in translating business requirements into practical solutions through close collaboration with clients.
Actively exploring **AI-powered development tools** to boost productivity, including **prompt engineering for agent coders and AI-assisted coding**.

Education

B.Sc. in Software Engineering
Faculty of Informatics Engineering – Damascus University, Syria

Work Experience

E-Learning Developer — Glotech (Feb 2023 – May 2023)

- Developed interactive e-learning courses using Articulate Storyline with a focus on user experience.
- Collaborated with teams to ensure timely delivery and high quality.
- Resolved bugs and performance issues to optimize content delivery.

Projects

Graduation Project – Cross-Border Bus Booking & Logistics System (2025)

- Designed and developed a complete system for bus booking and logistics between Syria and Jordan.
- Built apps for customers, admins, drivers, and support employees.
- Used Flutter, RESTful APIs, and Clean Architecture (Cubit).

📥 [Download App](#)

Folderit – Document Management Web App (2024 – Present)

- Flutter Web-based platform for secure document handling with version control and permission management.
- Responsive across devices with optimized performance.

Real Estate Marketing App (Jun 2024 – Aug 2024)

- Flutter-based platform for buying, selling, and renting real estate.
- Integrated RESTful APIs and included admin dashboard.

Home Gym App (Jun 2023 – Aug 2023)

- Home fitness app featuring trainer and nutritionist content with user-generated workout sharing.

Company Portfolio Websites (2024 – Present)

- Custom websites for companies to showcase services and projects using Flutter Web.
- Focused on responsiveness, performance, and clean UI/UX.
  - 🌐 : [Mosaic Company Website](#)

Technical Skills

- **Mobile & Web:** Flutter, Dart, Flutter Web, Clean Architecture, Cubit & BLoC
- **Backend & APIs:** REST APIs, Firebase, Supabase, Back4App
- **Version Control:** Git, GitHub, GitLab
- **Design & Tools:** Figma, Articulate Storyline
- **AI-Assisted Development:** Prompt engineering, agent coders, AI-driven productivity tools

Interests
- Building side projects
- Contributing to open-source
- Exploring emerging technologies
- Exploring **emerging technologies & AI in software development**
